Trip representation
h_{trip} (128-D)
Concept
predictor g_θ
128 → 128 → n_c
Named concept vector ĉ
15 named concepts (Nissan configuration)
Operating stress
D-BSI, cumulative stress,
temperature, throughput
Driving behavior
acceleration/jerk, energy, regeneration,
stop fraction, exploratory behavior proportions
Health and usage context
last available health anchor, age, mileage
Concept-to-health
head
Huber concept supervision
Independently computed
concept targets
